

# Airboard Introduction

The new era of winter sport “Airboard” comes onstage of Sapporo and Abashiri, Hokkaido.

- Everyone from a child up to an adult can easily have a fun with Airboard.
- It can be easily enjoyed at a short course since edge is attached to the back!
- By crawling your weight onto the Sledge, you can be freely moving and turning to the right and the left.
- You can also make sharp turn and stop quickly in the snow since it has grooves and edges on the underside.

Mt. Moere with an altitude of 62 meters is in city of Sapporo, it is unlike a skiing area but here is a place of the best condition at a sake for having fun of the Airboard. Since such place is in the middle of the park located in Sapporo, you can go there in less than half an hour from the central city, thus it is very convenient.

Moerenuma Park, Sapporo

Mt. Moere is in the place taking about half an hour by car from central city.

The Sea of Okhotsk

Lake Abashiri

## Option Travel Plan

When you have a plan for visiting Abashiri of sightseeing drift ice, by adding less than 1 hour, you can have an experience of "Airboard" you could never see at other areas.

It becomes your strategic operation plan in order to differentiate from other companies, and moreover, a customer (visitor's) satisfaction improves.

**Play and have a fun like this!!**
